Notes to the condensed interim financial statements
For the three months ended August 31, 2023 and 2022
(Unaudited - Expressed in US dollars)

1. NATURE OF OPERATIONS

Liquid Meta Capital Holdings Ltd. (“Liquid Meta” or the “Company”) was incorporated under the laws of British Columbia on January 6, 2020. On December 21, 2022, the Company announced that it initiated a process to evaluate potential strategic alternatives and that it was pausing the development of its proprietary software and tools to access, automate, and scale operations within the decentralized finance (“DeFi”) segment of the cryptocurrency industry. On March 9, 2023, the Company further announced that its board of directors had concluded the initial phase of its previously announced strategic review process, as disclosed in the Company’s press release dated December 21, 2022. In May 2023, as part of its Strategic Review, the Board determined that it is desirable and in the best interest of the Company to discontinue the operations of the Company’s crypto liquidity business and discontinue the development of the Company’s MetaBridge technology, following which the Company will have no active business operations.

The Company’s registered address is 700-401 West Georgia Street, Vancouver, British Columbia, V6B 5A1.

On December 17, 2021, the Company amalgamated with a shell company 1287413 B.C. Ltd. (“413”) (the “Amalgamation”) in order to effect a reverse takeover of “413” as part of a go public process (the “RTO”). The Amalgamation provided for a split (the “Share Split”) of the Company’s common shares of 2.5858 post-Amalgamation common shares for each pre-Amalgamation common share. The Share Split has been reflected in the condensed interim financial statements retroactively. On December 22, 2021, the Company’s common shares were listed on the NEO Exchange Inc. under the symbol “LIQD”.

On May 29, 2023, an aggregate of 2,000,000 stock options previously held by certain directors, officers, and employees of the Company was cancelled. The cancelled stock options had an exercise price of US\$1.00 per share and an expiry date of December 17, 2026.

On May 29, 2023, the Company issued a return of capital, amounting to \$10,767,449, to shareholders on record as of May 15, 2023.

2. BASIS OF PRESENTATION

Basis of preparation

These Unaudited Interim Condensed Financial Statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) as applicable to the preparation of interim financial statements, including IAS 34, Interim Financial Reporting and interpretations of the IFRS Interpretation Committee. Accordingly, certain disclosures included in the annual financial statements prepared in accordance with IFRS as issued by the IASB have been condensed or omitted and these Unaudited Interim Condensed Financial Statements should be read in conjunction with the Company’s Audited Financial Statements for the year ended May 31, 2023.

Basis of measurement

These Unaudited Interim Condensed Financial Statements have been prepared on a historical cost basis, except for financial instruments classified at fair value through profit or loss, which are stated at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

11. CAPITAL MANAGEMENT

The Company's capital management objectives are to preserve capital, especially during difficult macro-economic environments. The company can at times increase its cash and cash equivalents on its balance sheet to preserve its financial integrity. The Company defines capital as the aggregate of its share capital and borrowings.

The Company manages its capital structure in accordance with changes in economic conditions. To maintain or adjust its capital structure, the Company may elect to issue or repay financial liabilities, issue shares, repurchase shares, pay dividends or undertake any other activities as deemed appropriate under specific circumstances. The Company is not subject to any externally imposed capital requirements.

The management of the Company reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

12. FINANCIAL INSTRUMENTS

	As at August 31, 2023	As at May 31, 2023
Financial assets, measured at amortized costs		
Cash and cash equivalents	4,594,041	4,595,666
Amounts receivable	22,636	12,066
USD coin	-	1,320
Financial liabilities, measured at amortized costs		
Accounts payable and accrued liabilities	241,191	213,194
Digital asset loans payable – USD coin	-	7,103

The Company has determined the estimated fair value of its financial instruments, if any, based on appropriate valuation methodologies; however, considerable judgment is required to develop these estimates. The fair values of the Company's financial instruments, if any, are not materially different from their carrying values.

Financial instruments that are measured subsequent to initial recognition at fair value are grouped in levels 1 to 3 of the fair value hierarchy based on the degree to which inputs used in measuring fair value is observable:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities. There are no financial instruments measured at fair value which are classified as Level 1.

Level 2 – inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices). Receivables from decentralized platforms and USD coin as indicated in the statements of financial position are classified as level 2 financial instruments.

LIQUID META CAPITAL HOLDINGS LTD.

Notes to the condensed interim financial statements
For the three months ended August 31, 2023 and 2022
(Unaudited - Expressed in US dollars)

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs). The Company does not have any level 3 financial instruments.

Risk exposure and management

The Company's financial instruments are exposed to certain financial risks, which include the following:

(a) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The maximum exposure to credit risk at the reporting date to recognized financial assets is the carrying amount of cash and cash equivalents, USD coin, receivable from broker and receivable from decentralized platforms as disclosed in the statement of financial position. The Company does not hold any collateral.

The Company manages credit risk, in respect of cash and cash equivalents, by maintaining bank accounts at highly rated financial institutions. The Company performs due diligence checks before investing in any decentralized platforms.

(b) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulties in meeting obligations when they become due. The Company manages liquidity risk by maintaining adequate cash reserves, by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities. In addition, as outlined above the daily liquidity management function monitors and manages amounts deposited with digital asset custodians.

As at August 31, 2023, the Company had working capital of \$4,420,451 (As at May 31, 2023 - \$4,451,966)

(c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign currency risk, interest rate risk and price risk. These are discussed further.

I. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's interest-bearing financial instruments is limited to its cash and cash equivalents and therefore is not exposed to significant interest rate risk.

II. Foreign currency risk

Currency risk relates to the risk that the fair values or future cash flows of the Company's financial instruments will fluctuate because of changes in foreign exchange rates. The Company holds positions in various crypto currencies which have a market value stated in US dollars. Exchange rate fluctuations affect the costs that the Company incurs in its operations. The Company's presentation currency is the US dollar and major purchases are transacted in US dollars. The fluctuation in foreign currencies in relation to the Canadian dollar will consequently impact the profitability of the Company and may also affect the value of the Company's assets and liabilities.

III. Price risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk. The Company shorts the contracts underlying of digital assets inventory on exchanges to minimize the value fluctuation of digital assets and receivable from decentralized platforms. Had the value of the contracts increased or decreased by 10% as at August 31, 2023, with all other variables remaining constant, net loss and comprehensive loss for the period would have increased or decreased by Nil. (May 31, 2023– \$685). The risk associated with USDC pertains to the issuer's (Circle) ability to maintain its current capacity of USD reserves. The reserves are held in USD treasuries so there is minimal risk of being able to convert from USDC to USD at a 1:1 rate.

13. DIGITAL ASSETS RISK

Access to digital assets can be disrupted by a number of matters including:

- Loss of access risk, such as to private keys;
- Irrevocable transactions given that transactions cannot be changed or corrected once a transaction has been verified and recorded on the blockchain;
- Fluctuations in digital asset prices due to global forces, interest rate, exchange, inflation, political/economic conditions;
- Vulnerability of crypto networks to hacking; and
- Unregulated crypto exchanges.

Smart contract risk

DeFi, in several ways, substitutes custodial risk prevalent with centralized finance platforms with smart contract risk, allowing hackers and attackers to seize funds and tokens escrowed in smart contracts. Smart contracts are constantly exploited across the blockchain ecosystem, with hackers taking advantage of flaws in the code. DeFi smart contracts are managed using admin keys. These allow the key holder to make significant changes to the code, such as protocol upgrades. One way cyberattacks occur is when hackers gain control of private or admin keys, allowing them to deplete all or some of the liquidity within pools of certain projects, among others.

As at August 31, 2023, the smart contract risk is limited to the receivable from decentralized platforms of \$nil. (May 31, 2023–\$nil).

Digital asset transactions are irrevocable, and losses may occur

Digital asset transactions are irrevocable and stolen or incorrectly transferred crypto assets may be irretrievable. Digital asset transactions are not reversible without the consent and active participation of the recipient of the transaction. Once a transaction has been verified and recorded in a block that is added to the blockchain, an

incorrect transfer of digital assets will not be reversible. If the Company is unable to effect a corrective transaction with a third party, or is incapable of identifying the recipient of its digital assets through error or theft, Liquid Meta will not be able to revert or otherwise recover any incorrectly transferred digital assets, or to convert or recover digital assets transferred to uncontrolled accounts.

The Business of Liquid Meta will be exposed to cybersecurity risks

Cyber incidents can result from deliberate attacks or unintentional events, and may arise from internal sources (e.g., employees, contractors, service providers, suppliers and operational risks) or external sources (e.g., nation states, terrorists, hacktivists, competitors and acts of nature). Cyber incidents include unauthorized access to information systems and data (e.g., through hacking or malicious software) for purposes of misappropriating or corrupting data or causing operational disruption. Cyber incidents also may be caused in a manner that does not require unauthorized access, such as causing denial-of-service attacks on websites (e.g., efforts to make network services unavailable to intended users). A cyber incident that affects Liquid Meta, the DEX's it is providing liquidity to or its service providers might cause disruptions and adversely affect their respective business operations, and might also result in violations of applicable law (e.g., personal information protection laws), each of which might result in potentially significant financial losses and liabilities, regulatory fines and penalties, reputational harm, and reimbursement and other compensation costs. In addition, substantial costs might be incurred to investigate, remediate and prevent cyber incidents.

The evolving regulatory environment and various standards of transparency surrounding the operations of digital asset exchanges may cause the marketplace to lose confidence in crypto assets globally

Liquidation risk

The Company supplied or borrowed digital assets on certain DeFi protocols. These digital assets could fluctuate in value due to the systemic risks of the issuing platforms or market volatility, including the loss of peg of certain pegged assets. This could result in the liquidation or closing of a user's position.

Reliance on Decentralized Exchanges (DEXs)

As a liquidity provider on a variety of decentralized protocols and applications, Liquid Meta is dependent on these public DEXs in the normal course of business. There is no guarantee that DEXs will continue to scale or upgrade over time such that their functionality improves or continues to be used by users. Additionally, the risks inherent to public blockchains, such as smart contract risks or cybersecurity risks, continue to apply to DEXs. There is also no certainty as to the future regulatory environment regarding DEXs or DeFi and any adverse changes could substantially impact our ability to conduct our business.

Reliance on Centralized Exchanges (CEXs)

As a liquidity provider to DeFi projects and platforms, Liquid Meta rely on centralized exchanges such as Kraken and Binance. It is necessary for exchanging capital with the Company's traditional banking partners. The Company exchanges fiat and other forms of capital into digital assets that can then be used across various protocols and applications. Liquid Meta will also from time to time hold some of its assets including traditional fiat currencies (notably USD) on these CEXs. Liquid Meta is reliant on these CEXs for the exchange of fiat/digital assets and at times the custodial services they provide for capital not being deployed on the DEXs. Any change to the CEXs business models, practices, ability to custody assets, ability to send or receive payments, solvency, swap or

exchange assets, or be subject to security breaches or hacks could have a meaningful impact on Liquid Meta's operations and potential loss of some or all of our assets.

Regulatory changes or actions may alter the nature of an investment in the Company or restrict the use of digital assets in a manner that adversely affects the Company's operations.

Due to their global nature, digital assets are subject to regulatory fragmentation due to different treatment depending on jurisdiction. Certain governments have categorized cryptocurrencies as illegal while others have embraced their utility and have approved them for trade. Ongoing and/or future regulatory actions may alter the ability of the Company or any digital assets that the Company may stake, exchange, trade, mine, harvest, purchase or sell impossible to predict and may have a substantial impact on the Company's business operations. Governments may take regulatory actions that prohibit or restrict the right to acquire, own, hold, sell, use or trade digital assets, or to exchange digital assets for fiat currency.
